MEMORANDUM

TO: Students, Faculty, Staff and Parents of Ft. Deposit Elementary, Hayneville Middle, Lowndes Career Tech. and Head Start Centers

FROM: J. Wm. Covington, Ed.D.

RE: Environmental Protection Agency (EPA) Asbestos Notice

An EPA-approved asbestos inspector has inspected all public schools in Lowndes County. Each school has a maintained management plan on file as required by the Asbestos Hazard Emergency Response Act (AHERA), and this document is available for any parent to view.

Although we do have non-friable asbestos containing building materials (ACBM) in our facilities, we do not have any friable ACBM. The non-friable ACBM in our facilities are well maintained. Non-friable materials do not crumble, and thus do not become airborne. The law requires that we make this notice to all employees, students and staff annually.

We are happy and proud to provide a healthy atmosphere for our students, faculty, and staff
